

Ø 0.875"

DEGRADABLE DIVERTER BALL

Tested to withstand pressures exceeding 10,000 psi and degrade into a liquid.

BLOCK PERFORATIONS IN PLUG-AND-PERF COMPLETIONS

MAGNUM FASTBALL™ DDB

INNOVATION REVEALED

The Magnum Fastball™ DDB (Degradable Diverter Ball) is used to block perforations in plug-and-perf completions as a zonal isolation tool in initial fracing and re-frac jobs. These balls are tested to withstand pressures exceeding 10,000 psi and degrade into a liquid.

Diameter:
Ø 0.875"/22.225 mm

Specified Gravity:
1.20–1.30

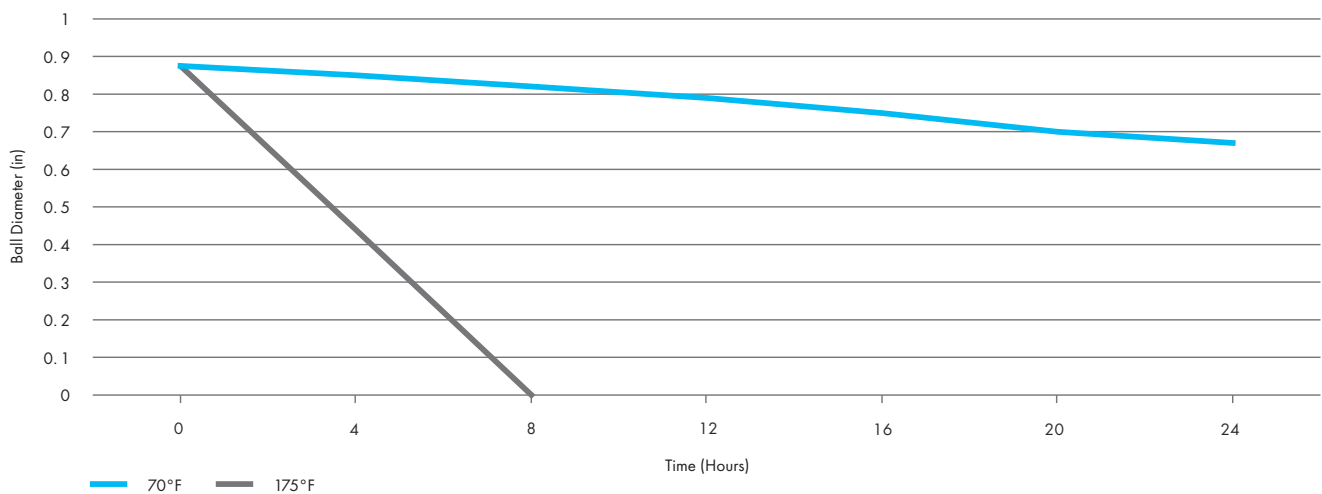

Temperature Range:
90°F to 170°F BHT

Compatible Fluids:
Polar solvents such as water, brine, short chain alcohols

Incompatible Fluids:
Non-polar solvents such as Toluene, Xylene, Diesel, Benzene, Kerosene

Handling:
Keep in sealed bag in cool area until ready for use. Coat the balls in mineral oil prior to placing in ball injector to prevent sticking.

Diameter Decrease at 70°F and 175°F in Fresh Water
