

FRAC DART

Run in conjunction with the Scorpion Composite Frac Plug, Nine's Frac Dart allows operators the chance to reinitiate pump down if the guns do not fire post-plug setting.

The Frac Dart has been precisely engineered to install at the end of the Scorpion Composite Frac Plug and has the ability to reliably perform in a variety of downhole conditions. By running the Frac Dart by Nine, operators can eliminate the need to pump down a ball from surface further enhancing operational and environmental efficiencies by saving time, water and money.

Features

- Significant reduction in downhole intervention
- Eliminates the need to flow back the ball if a screen out or misrun occurs
- Reduce or eliminate non-productive time caused by misruns or screen outs
