## THE EASY CHOICE FOR COMPLEX LATERALS

Nine Energy Service is equipped with the expertise and tools to handle the industry's most challenging and complex coiled tubing projects. Backed by our talented team of technicians and engineers, our solutions can help you improve performance, safety, and cost-efficiency on extreme laterals and high-pressure operations.

---

AT 25,595 FEET, WE RAN  
THE LONGEST 2 5/8-INCH  
COILED TUBING STRING  
ON RECORD IN NORTH  
AMERICA

# COILED TUBING SERVICES: UNSURPASSED CAPACITY

Our coiled tubing units range from 1¼ to 2 5/8-inches in diameter. With large capacity units, we can run up to 28,000 feet of 2 3/8-inch coiled tubing.

## OUR SUPPORT SERVICES INCLUDE:

Frac plug millout

Wellbore cleanout

Fluid pumping

Nitrogen pumping and bulk nitrogen delivery/sales

Tubing-conveyed perforating (jet or abrasive)

Fishing/milling

Stimulation via coiled tubing

Crane Services

Pre-job engineering, planning, and design with industry-leading software

## ALLSIGHT LIVE JOBSITE DASHBOARD: MONITOR AND MANAGE PROJECT DETAILS

Electronically track, evaluate, and manage every aspect of your coiled tubing job with real-time and historical data. Field-tested and fully operational with all of our units, our proprietary internet-based software puts unmatched power of better decision-making in your hands.

## FEATURES INCLUDE:

Complete transparency of coiled tubing operations, allowing you to make more informed decisions now and for future operations

Accurate, real-time job information including surface and downhole events, data acquisition monitoring, and comprehensive non-productive time statistics

Vital job information available from any internet-connected device

Data-point scrolling and zooming capabilities to clarify operational issues and performance in detail

A checklist to improve quality and safety issues, including digital Job Safety Evaluations, personnel certifications and renewal alerts along with inspection and maintenance histories

Comparative equipment data and performance metrics

Chemical information and relevant Safety Data sheets

Visual display of metrics such as rig-up times, non-productive time, time in well, plug millout times, running footage, and other relevant data

## TruSight™ DOWNHOLE MEMORY TOOL LOGGING SERVICES

### REVEAL VALUABLE INSIGHTS FROM 20,000 FEET AWAY

When you're miles away from the action in your deepest, longest horizontal wells, it's easy to feel like you're in the dark. With TruSight Downhole Memory Tool Logging Services, you can see what's happening in data-rich detail, enhancing your ability to make better decisions.

With accurate, multi-sensor technology and data-mapping software, you can measure the forces at play downhole, compare with surface data, identify where stalls occur, and track trends for future insights.

## BENEFITS

Compare sensor-package data with surface data (pressure, depth, weight)

Confirm and analyze downhole events

Optimize plug and BHA selection

Plan next work based on actual results

Correlation of wellbore friction factors

Assessment of wellbore cleanout efficiency

Evaluation of actual versus predicted WoB

Assess forces from extended reach tools

Validation of PDM torque output

Verification of downhole tool functions

Identify thief zones

Pressure and temperature gradients

Productivity Index analysis

Dog-leg severity versus pipe stresses

## SENSOR PACKAGE

Weight on Bit (WoB)

Torque

Internal pressure

Temperature

G-force acceleration

Side load and Inclination (coming soon)

As part of our services, Nine can help you turn your data into actionable information. We can also provide a more comprehensive report that will help you turn the data into actionable information.

## EXPERTISE, EQUIPMENT AND EXPECTATIONS: DELIVERED FAST

With Nine Energy Service, you're not waiting around for your well to become productive and profitable. We promptly deliver the equipment and expertise to service the longest and most complex horizontal wells—at any stage. We're also quick on our feet. We know how to solve problems, even when those problems are outside of our job scope.

Ultimately, our speed is a result of doing things the right way, ensuring safety and compliance every step of the way.

## NINE IS WHERE YOU NEED US.

We support customers in major North American Basins with comprehensive solutions and expertise.
